SPONSORSHIP INVITATION

International Agentic AI Accountability and Liability Summit 2026

Wednesday, 25 November 2026 | 14:00-18:00 IST (08:30-12:30 UTC) | Online, half day

Day 1 of ICCC 2026, the International Conference on Cyberlaw, Cybercrime & Cybersecurity

THE QUESTION

The Government of India has publicly signalled that it is working towards a dedicated law on AI. When an AI agent acts on its own, who answers for it? That question will sit at the centre of any such law, and it is being asked across the world.

WHY THIS IS A GLOBAL QUESTION

- **European Union:** from 9 December 2026, the revised Product Liability Directive treats software and AI as products, bringing them under no-fault liability. The separate AI Liability Directive was withdrawn in 2025.
- **United Kingdom:** the Information Commissioner's Office is taking evidence on agentic AI until 20 November 2026, to shape its future guidance.
- **Singapore:** IMDA launched a Model AI Governance Framework for Agentic AI in January 2026, built on the principle that humans remain accountable for what agents do.
- There is still no settled international answer on who is liable when an autonomous agent causes loss.

THE SUMMIT

On 25 November 2026 Dr. Pavan Duggal convenes international legal experts and industry leaders in a focused half-day working session on one question: when an AI agent acts, who answers, on what record, and under what law. The Summit will test the leading liability models (product liability, fault, agency and fiduciary duty) and how each works across borders, and will turn the lessons into specific recommendations on AI and agentic AI for submission to the Government of India. Interventions are of about five minutes; written notes and recorded interventions are accepted; nothing is presented as agreed.

PROGRAMME (DRAFT, 4 NOVEMBER 2026)

Time (IST)	Session	Speakers on the draft agenda
14:00-14:20	**Opening: the Summit question and the six instruments under consideration**	Dr. Pavan Duggal, Senior Advocate, Supreme Court of India; Conference Director, ICCC; Global Chair, International AI Accountability Forum
14:20-15:20	**Session 1: WHO ANSWERS** Accountability when an autonomous agent acts: allocation of responsibility across developer, deployer, operator and user; boards, insurers and regulators: who carries the loss	Lt Gen (Retd) Rajesh Pant, former National Cyber Security Coordinator Prof. Dr. Martin Ebers, President, Robotics & AI Law Society (RAILS), Berlin Teresa Rodriguez de las Heras Ballell, Full Professor of Commercial Law; Director, Chair AI Foundations & Frontiers, UC3M Madrid Apurva Gopinath, Cyber Leader India, Aon Dr. Richa Choudhary, Dean Law, SGT University
15:20-16:20	**Session 2: ON WHAT RECORD** The evidentiary foundation of agent accountability: what record must exist, and who must hold it, so that a court can find who authorised the agent, what authority it had, what it did, and whether the act stayed within that authority	Raza Sharif, Founder & CEO, CyberSecAI, UK Dr. Satya N. Gupta, NGNguru / BlueTown Dr. Geetha Raju, Principal AI Policy Analyst, CeRAI, IIT Madras Anil Anisetti, Founder, ESF Labs
16:20-16:30	Break	
16:30-17:30	**Session 3: UNDER WHAT LAW**	Peter Salib, University of Houston Law Center (pre-recorded)

	Liability doctrines, jurisdiction and the draft texts: criticism of the positions and draft texts under consideration; jurisdiction, enforcement and the Global South common minimum	Ken Huang, Adjunct Professor, University of San Francisco; Co-Chair, AI Safety Working Groups, Cloud Security Alliance (written note) Dr. Anat Lior, Associate Professor of Law, Drexel University Kline School of Law Dr. Tariq Rauf, Former Head, Verification & Security Policy, IAEA Bryant Walker Smith
17:30-18:00	**Closing: what the Summit records, and the road to the ICCC 2026 Outcome Document**	Dr. Pavan Duggal

Speakers as on the draft agenda of 4 November 2026, subject to final confirmation.

WHAT YOUR COMPANY GAINS

A voice in India's AI law

- Contribute your perspective to the recommendations going to Government, while the law is still being shaped
- Put the real issues your business faces with AI agents on the table: liability, contracts, compliance, customer harm and cross-border use

A global perspective

- Understand how the EU, UK and Singapore are allocating responsibility for AI agents, and what that means for your products and contracts in those markets
- Benchmark your own AI agent deployments against emerging international expectations

Thought leadership

- Be seen as a responsible adopter of AI by legal, policy and industry leaders in India and abroad
- The Principal Partner speaks in the Summit itself

Access

- Senior representatives invited into the working session with international legal experts
- Direct engagement with the ICCC 2026 community

Early insight

- Early access to the outcome note and recommendations before public release
- A clear view of where liability for AI agents is heading, before regulation arrives

Visibility

- Brand visibility across Summit and ICCC 2026 promotions on LinkedIn, X and Instagram
- Acknowledgement in the programme and opening remarks
- Association with all three days of ICCC 2026, 25 to 27 November

SPONSORSHIP

Tier	Contribution (plus GST)	Entitlements
Principal Partner (one only)	₹3,00,000	Speaking intervention, top billing, two senior representatives in the session, written input to the recommendations
Associate Partner (up to three)	₹1,50,000	Logo, named acknowledgement, one senior representative in the session, written input to the recommendations
Supporting Partner (up to five)	₹75,000	Logo, programme mention, written input to the recommendations

Recommendations are framed independently, and every participant's input is weighed on merit. Places are limited.
